

ENERGY MANAGEMENT POLICY

As Akenerji, with the objective of being one of Türkiye's leading private-sector electricity generation companies, and in order to identify and effectively manage our significant energy-consuming resources, we commit to the following;

PROVISION OF RESOURCES

- To provide the necessary information, human resources, financial resources, infrastructure, and working environment required to achieve the established energy objectives and targets,
- To provide a framework for the establishment, implementation, and regular review of energy objectives and targets defined to continuously improve our organization's energy performance,

COMPLIANCE WITH LEGAL AND OTHER REQUIREMENTS

- To comply with all applicable legal and other requirements related to energy efficiency, energy use, and energy consumption,

PROCUREMENT OF PRODUCTS AND SERVICES

- To consider energy efficiency as a selection criterion when procuring products and services that affect energy performance,
- To prioritize sustainable and efficient solutions in procurement processes,

INVESTMENTS

- To evaluate opportunities to improve energy performance in the design, modification, and investment activities carried out in existing facilities, as well as in newly established facilities, and to integrate energy performance criteria into relevant decision-making processes,

AWARENESS

- To conduct training activities at regular intervals in order to increase our employees' awareness of energy efficiency and energy conservation,

CONTINUAL IMPROVEMENT

- We commit to monitoring, implementing, and continually improving energy performance and the energy management system in an integrated manner with other management systems,
- We commit to periodically reviewing our energy management policy and updating it, when necessary, in light of technological and sectoral developments.
